PROJECT SUN STREAK (U)WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

CRV Session Procedures Report (S/NF/SK)

```
|Control Number   : 8706|
|Date of Session  : 07Apr87|
|Date of Report   : 07Apr87|
|Source Identifier: 003|
```

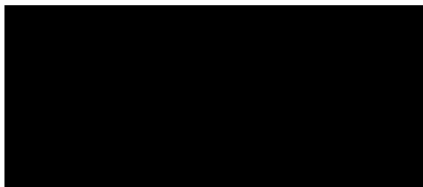

1. (S/NF/SK) Tasking: See tasking data sheet, attached. No further instructions received.

2. (S/NF/SK) Session: A good deal of session time was spent discussing source PI's (psychological, not physical). Nevertheless, session felt copacetic to monitor; rapid target acquisition combined with many indicators. Source suspected possible AOL with regard to the idea of SDI, but said that it did felt like signal line. Source produced the word "unfinished" early in S4 and was instructed to turn his attention in that direction because he was probably on the target.

3. (S/NF/SK) Summary: AI of "fascinating". A "technical" structure under construction in a remote area with green hills and water. [It is huge, airy, flat, tapered, rounded with a platform, (perhaps for landing helicopters).] (See source sketch in session notes). Installation involves complex electrical/electronic systems, as well as a "core". Source perceives this site to be "the answer to SDI". See session notes for amplifying data.

4. (S/NF/SK) Feedback: Source was informed that he was probably on target but that the monitor would require additional instructions in order to proceed.

Core

Central

obscure

2 meanings

→ 4 1/2 Core = central self-contained portion of family - Absorb essential for functioning. Could function with other component missing but not this.

"They" are working on the Core.

Impress that core also refers to dedicated para source, probably nuclear

Als/5 1/2 Impression of whole structure ^{flashing} "lit up" with radiant energy + ^{pulsing} pulsing both ^{emanating} ^{receiving} idea of space attack in hostile mode

✓ feelings not necessarily visual

Are BK particle beam etc.

like it's under attack and attacking back! ~~not~~ necessarily with some "things/method"

Site under construction in a remote
area with vegetation + water nearby. Structure is huge, ring
flat, tapered, rounded with a platform involved - perhaps
for landing helicopters. Construction is irregular & unfinished -
material - mainly metal are being up to work on structure both
above + below platform. Complex electronic + electrical systems must
be in place before rest of work can be completed. Structure
involves weapon syst. control, with a shielded concept. Impression
of connection & response to SDI - a word is perceived as offensive.
Large loads of radiant pulsing energy both being sent and
received + defended against seems an important concept of
the site. Site is vertically oriented primarily in a
hor. physical sense, and is designed to operate in
wide scope over immense distances.
